DADE. 1673.

A
PROGNOSTICATION

In which you may behold the state of
this year of our Lord God, 1673.

Being the Year after the Bissextile

Having the Disposition of the FOUR
Seasons, the Eclipses, the Oriental and Oc-
cidental Position of the Planets, with the
increase and decrease of the Moon, and
daily inclination of the weather.

Also certain Physical verses, and short
Rules for Husbandry for every moneth
throughout the year.

With other NOTES of good
consequence.

By WILLIAM DADE, Gent.

LONDON,

Printed by T. N. for the Company of
Stationers, 1673.

A BRIEF and necessary Table, for the beginning
and ending of the four Terms,
with their Returns.

Hillary Term begins *January 12.* and ends *February 12.* and hath four Returns.

Octob. Hillarii. <i>Jan. 21.</i>	Craft. Purif. <i>Feb. 3.</i>
Quind. Hillarii. <i>Jan. 28.</i>	Octab. Purif. <i>Feb. 10.</i>

Easter Term begins 17 days after Easter, and ends the
Munday after Ascension day and hath five Returns.

Quind. Pasch. <i>Apr. 4.</i>	Quinq. Pasch. <i>May 5.</i>
Tres Pasch. <i>Apr. 21.</i>	Craft. Ascen. <i>May 9.</i>
Mense Pasch. <i>April 28.</i>	

Trinity Term begins the Friday after Trinity Sun-
day, and ends the Wednesday fortnight after, and
hath four Returns.

Craft. Trin. <i>May 26.</i>	Quind. Trin. <i>June 9.</i>
Octab. Trin. <i>June 2.</i>	Tres Trin. <i>June 16.</i>

Michaelmas Term begins the 23. of *October*, and ends
the 28. of *November*, and hath six Returns.

Tres Mich. <i>Octob. 20.</i>	Craft. Mart. <i>November 18.</i>
Mense Mich. <i>Octob. 27.</i>	Octab. Mart. <i>November 19.</i>
Craft. Anim. <i>Novemb 3.</i>	Quind. Mart. <i>November 26.</i>

Note that the Exchequer openeth eight days before
any Term begins, except Trinity Term, in which it
openeth onely four days before.

On these days following the Judges sit not at
Westminster.

A Prognostication.

A Description of the Four Quarters of the Year.

And first of Winter.

Sol in ♍, ☊, ♋.

Winter Quarter (after the Astronomers account). began the Eleventh of *December*, 1672, at 30 min. past 1 in the morning, and continues till the 10 of *March* this year 1673. So that alwayes the first part of the Astronomical Winter is in one Politick year, and the latter end thereof is in the other; at which time was the shortest day of the year, by reason of the Suns greatest declination from the Equinoctial Line.

This Season of its own disposition, is known to be cold and moist, contrary to the quality of Summer; and in this quarter, the inward parts of Man are very hot, and being healthful, may receive plenty of food, because natural heat is now comforted, and is gone inward, and there increased, and maketh digestion the better.

How the Weather will be therein disposed, is noted for each day throughout the Quarter.

The Sickneses whereunto this Quarter is most inclined are Rhumes, Gouts, Pushes, Sore-eyes, Melancholy, Coughs, Catharrs, Sciaticaes, Falling-sickness, diseases proceeding of Rottenness and corrupt Humors, with divers kind of Infirmities incident among women.

DADE, 1673.

Of the second Quarter of the Year, called
The Spring.

Sol in γ , δ , II.

THE Spring time (being the most pleasant and wholesome Season of the four) taketh its beginning on Sunday the 9th of *March*, at 1 in the morning, when the Sun entreth into the first minute of the Equinoctial point *Aries*, making the dayes and nights of equal length, which quarter endeth the 11. of *June*, when the Sun entreth into *Cancer*.

This season is naturally hot and moist, and is of the Sanguine complexion, being the most temperate and healthful time of the year, and is therefore accounted the fittest time to ease diseased Bodies in, and to restore health again, in those in whom formerly it hath been decayed by any kind of evacuation.

The particular condition thereof, may be seen in the daily disposition of the Season.

The infirmities of this Quarter are Melancholy, Madnes, the falling sickness, bleeding at the Nose, Hoarsness, Coughs, Itch, Scales, many Ulcers and smal Apostumes, the Gout and Pain in the Joynts, Plurisies, Dropsies, pestilent Agues,
Shortness

A Prognostication.

Shortness of Breath, Faintings, Pain in the Head, Eyes, and Stomack, rotten Feavers, and other strange Diseases.

Of the third Quarter of the Year, called Summer.

Sol in φ , δ , η .

SUMMER (accounted the third part of the Year Astronomical) taketh always its beginning at the time of the Suns entrance into the first min. of the Solstitial signe *Cancer*, which is this year on Tuesday the 10th of *June*, at 13 m. past 9 in the morning, at which time he makes his greatest declination from the Equinoctial towards the North, and causeth the longest day and shortest night in the year; and so Summer holdeth on till the thirteenth of *September* following.

In this Quarter the Stomach cannot digest such hard meats as it will in the Winter season for that natural heat is now distributed into the exterior parts, and man is not now so hot within as in winter.

As for the disposition of the Weather, you may see in the daily inclination.

The Sickneses at this time are divers, as burning Agues, Plurisies, Frensies, hot Apostumes, divers Pains in the Head, sundry Inflammations, and new Infirmities proceeding especially of hot cholerick humors, wherewith many will be sore molested.

D A D E. 1673.

Of the fourth Quarter of the Year called
Autumn or fall of the Leaf.

Sol in ♎, m, ♄.

Autumn or Harvest (being the Fourth and last Quarter of the Year) beginneth upon Thursday the 12th of *September*, 14 min. before 5 afternoon, the Sun then making his entrance into the first minute of the second Equinoctial Sign *Libra*, working the same effect that he did at his entring into *Aries*, that is, Making the days and nights of equal length, he rising at six in the morning, and setting at six at night; and this Quarter doth last until the eleventh of *December* following.

The quality of this Season is naturally cold and dry, yet by reason of its mutability, it is the most unwholsome; by means whereof, it is more subject to sickness then any other: For the dregs of all Diseases of the former parts of the Year, will now burst forth and be seen.

How the Air is like to be inclined all Harvest, may be seen in the daily disposition of the Season.

The Diseases of this Quarter are like to be many and dangerous, as Black-Jaundies, Megrims, the Falling sickness, Opilations in the Spleen, difficulty of Breathing, Convulsions, Dropsies, Sciaticas, Biles, Tooth-ach, and many more. From which Good Lord deliver us.

Of

A Prognostication:

Of Eclipses.

There will this year be only Two *Eclipses*, and both of them of the Sun, but neither of them will be visible (in any measure) to the Inhabitants of this our *British* Island.

The First of these Eclipses will happen upon Thursday, the 6th of *February*, about 8 of the Clock at night, and so cannot be seen of us, for that the Sun is then under our *Horizon*.

The other Eclipse will be upon Saturday, the second of *August*, about 9 of the clock in the morning; and although the Sun be then above our *Horizon*, yet (in respect of the *Moons* Latitude and Parallax) it will be hardly (any part of it) discernable, 'tis possible, the curious Astronomical Observer may make some discovery towards the end thereof; but these things being too nice and curious for the vulgar, for whom this Prognostication is principally intended, I shall say nothing more of it, only those that inhabit in the Western Islands in *Barbadoes*, may see it almost totall.

Here

DADE, 1673.

Here followeth certain *Physical Verses*, with a Description how the *Planets* are placed in the *Heavens*, either before or after the *Sun*, whereby you may perceive how they keep their motions, day and night. To which is annexed the *New*, *Full*, and *Quarters* of the *Moon*, with the daily disposition of the *Weather*; also short *Rules* for *Husbandry* for every *Moneth* throughout the *Year*.

Of *January*.

If thou be sick and help wouldst have,

The counsel of the Learned crave.

If thou hast Health, to keep thee so,

Fly Idleness as deadly so.

Saturn is Occidentall, and may be seen after sun-set.

Jupiter is in Trine to the Sun.

Mars is Occidentall, and may be seen after Sun is set.

Venus is Occidentall, and at her greatest distance from the Sun.

Mercury is in Conjunction with the Sun in the middle of the Moneth.

The 1, 2 and 3 days Wet and Slabby.

The 4, 5, 6 and 7 more fair and dry.

New Moon on Tuesday the 8 day, 7 min past 2 in the morning.

The 8, 9 and 10, Wet and Windy,

The 11, 12 and 13 Fair and Frosty.

The 14 and 15, Snow-like.

First

A Prognostication.

First Quarter on Thursday the 16. day, 37 m.
past 3 in the morning.

The 16, 17, and 18 Windy.

The 19, 20, and 21 Wet.

Full Moon on Saturday, the 22 day, 10 min. past
1 in the afternoon,

The 22, 23, and 24 Frost.

The 25 and 26 Winde.

The 27, and 28 Snow or Rain.

Last Quarter on Wednesday, the 29 day, at 25
min. past 5 at night,

Jannarias Instructions for Husbandry.

This Moneth set all kinde of Fruit-trees, and
Quicksets: In the New of the Moon (the wind
and weather observed.) you may set Pease and
Beans, Parsnips, and Oats, if the weather prove
milde, and the Moon decreasing.

Of February.

Be choice of Food in any wise,

To keep thee warm also precise:

Beware likewise thou let not blood,

Except the Learned think it good.

Saturn may be seen in the West after Sun-set.

Jupiter is opposi^e to the Sun at his setting.

Mars is South-west of the Sun.

Venus and **S**aturn are in Conjunction.

Mercury is at his greatest distance from the Sun.

The

D A D E. 1673.

The 1, 2, and 3 dayes Frost.

The 4, and 5, more milde.

New Moon on Thursday, the 6 day, 29 min. after 6 of the clock at night.

The 6, 7, and 8 Faire.

The 9, 10 and 11 Frost.

The 12 and 13 Windy.

First Quarter on Fryday, the 14 day, about 9 in the morning.

The 14, 15 and 16, Snow or Sleete.

The 17, 18 and 19 Wet and Windy.

Full Moon on Thursday the 20 day, 6 min. after midnight.

The 20 21 and 22, Raw cold weather.

The 23, 24, and 25 Windy.

The 26 and 27 cleere Aire.

Last Quarter on Fryday the 28 day, at 11 min. after 11 before Noon, faire.

Februarie's Instructions.

In this Moneth set Roses, with all other kind of Plants, and Quicksets, sow Pease and Onions; as in the Moneth before (the weather considered) you may now garden for Sallet-herbs, and such like.

Of March.

New Bleed and Bathe if thou desire,

And Purge also if need require.

Ill humours do in many breed,

Provide in time before you need.

A Prognostication.

Saturn is with Conjunction with the Sun, rising with him.

Jupiter is in near opposition to the Sun.

Mars rises before the Sun.

Venus may be seen after Sun-set.

Mercury is under the Sun-beams.

The 1, 2, and 3 dayes Variable and uncertain.

The 4, 5, 6, and 7 Windy.

New Moon on Saturday, the 8 day, 12 min. after 12 at noon.

The 8, 9 and 10 cold Rain.

The 11, 12, 13 and 14, drying Windes.

First Quarter on Saturday the 15 day, 6 min. past 4 after noon.

The 15, 16 and 17 sudden showers.

The 18 and 19 cold and dry.

The 20 and 21 faire.

Full Moon on Saturday the 22 day, 38 min. past 11 before noon.

The 23, 24 and 25 faire and cleere.

The 26, 27 and 28, small Rain.

The 29, 30 and 31 Showery.

Marches Instructions.

This Moneth (in the New of the Moon) graft, set Quicksets and Vines, cut your Hedges and Vines already growing: Also you may sow Onions, Beans, and Oats, and all manner of Garden-seed.

DADE 1673:

Of April.

*Now wholesome Baths thou mayst frequent,
Let blood also, and not repent:
These are good means thee to defend,
From Grieffs, the which on thee attend.*

Saturn riseth after the Sun.

Jupiter is opposite to Saturn.

Mars and **V**enus are together towards the end of
the Moneth.

Mercury is at his greatest distance from the Sun.

The 1, 2, and 3 Rain.

The 4, 5, and 6, Haile and windy.

New Moon on Monday, the 7 day, 10 min aft.
10 in the morning.

The 7, 8 and 9 cloudy.

The 10, 11 and 12 Winde and rain.

First Quarter on Sunday the 15 day, 6 min. past
9 at night.

Fair and good Spring weather all this whole
Quarter.

Full Moon on Sunday the 20 day, a quarter of
an hour after midnight.

The 20, 21 and 22 Haile.

The 23, 24 and 25 Thunder.

The 26 and 27 Showery.

Last Quarter the 28 day at midnight.

Fair weather concludes the Moneth.

April's

A Prognostication.

April's Instructions.

In this month Pole your Hops, sowe Barley and Artichoacks, Bark Trees for *Tanners*, sowe Hemp and Flax, set Citrons, Melons, and Cucumbers and furnish and replenish your Gardens with Summer-herbs.

Of May.

Rise early now this Moneth of May,
And walk the Fields that be so gay:
From Surfetting see thou refrain,
Or soon it will procure thy pain.

Saturn is South-west at Sun-setting.
Jupiter is Stationary.

Mars and Venus are in Conjunction, and rise before the Sun.

Mercury is with the Sun in the middle of the Moneth.

The 1, 2 and 3 dayes hoary Frosts.

The 4 and 5 coole aire.

New Moon on Tuesday the 6 day, a quarter past 11 before noon.

The 6, 7 and 8 faire and pleasant.

The 9 and 10 hot and cloudy.

The 11 and 12 inclining to Rain.

First Quarter on Tuesday the 13 day, a quarter after 2 in the Morning.

The 13, 14, and 15 hot weather.

The 16, and 17 Thunder, and

The 18 and 19 dry hot weather.

End

DADE. 1673.

Full Moon on Tuesday the 20 day, half an hour
past 1 in the Afternoon.

The 20, 21 and 22 Showers.

The 23, 24 and 25 Flying Clouds.

The 26, and 27 Rain.

Last Quarter on Wednesday the 28 day, half an
hour past 10 at night.

Setled Weather to the Moneths end.

May's Instructions.

In the beginning of this Moneth you may sow
the Seeds of Summer-Herbs, which could not
endure the cold of the forepassed Moneths. You
may yet sow Hemp and Flax; Weed your Hop-
Gardens, and take away superfluous Branches,
and Moss your Gardens.

Of June.

*Drinks new or sweet taste not at all,
For thereby grows no danger small:
And to thyself such past-time take,
As may in God thee merry make.*

S*aturn* is in the mid-Heaven at Sun-set.

Jupiter riseth with the Sun.

Mars will be with the Moon at Midnight the 7
day.

Venus is joyned with the Sun.

Venus and *Mercury* are in conjunction at the end
of the Moneth.

The 1, 2, and 3 dayes serene and cleare.

New

A Prognostication.

New Moon on wednesday the 4th day, 10 min.
past 7 at night.

The 4, 5, 6 and 7 Cloudy; and

The 8, 9, and 10, like to Thunder.

First Quarter on Wednesday the 11 day, at 9
at night.

The 11, 12, and 13 fair weatber.

The 14, 15, and 16 some Rain.

The 17 and 18, fair and pleasant,

Full Moon on Thursday the 19 day, at 4 in the
morning.

The 19, 20 and 21, very hot.

The 22, 23 and 24 Gentle Windes.

The 25 and 26 mittigating the former heat.

Last Quarter on Friday the 27 day, 20 min. af-
ter 6 at night.

The 27, 28, 29 and 30 Temperate and good
Harvelt Weather.

June's Instructions:

In this Moneth (at the Full of the Moon)
gather your Herbs to keep dry for the whole
Year: Weed your Corn-fields and Gardens; set
Rosemary and Gilli-flowers; sow Lettice, shear
Sheep, the Moon increasing.

Of July.

Perfume thy House with savors sweet,

But such as are for purpose meet.

Abroad as thou in Streets do'st go,

Defend thy self from stinks also.

Saturn

D A D E, 1673.

S *Atturn* is near South-West at Sun-set, and R^etrograde.

Jupiter is with the Moon at Noon, the 10 day.

Mars is Conjunction with *Mercury*.

Venus is with the Sun in Conjunction.

Mercury is under the Sun-beams.

The 1, 2 and 3 dayes Windy.

New Moon on Friday the 4th day, 9 min. past 2 in the morning.

The 4, 5 and 6 flying Clouds.

The 7, 8 and 9 Blustering Weather.

First Quarter on Thursday the 10th day, 38 min. past 6 at night.

The 10, 11, and 12 Faire.

The 13, 14 and 15 Windy.

The 16 and 17 more calme.

Full Moon on Friday, the 18 day, at 7 at night.

The 18, 19 and 20 Moist Weather.

The 21, 22 and 23, Windy.

The 24, and 25 Thunder.

Last Quarter on Saturday the 26 day, at 3 quarters of an hour past 3 in the afternoon.

The 26, 27 and 28 Wind.

Timber in the Old of the Moon; uncover the
Roots of your Fruit-trees, Fallow Land for Bar-
ley, cover Herbs from cold, look well to your
Cattle, take Fowls with Nets, or Lime-twigs.

A Description of the Magnitudes, Motions and Distances of the Seven Planets

A *Rgol*, a laborious and Learned *Astronomer*, giveth this account of the Planets Motions and Distances, to wit,

Saturn, Nine times.

Jupiter, Fourteen times.

Mars, Two thousand five hundred thirty five times

Venus, Twelve hundred and seventy times.

Mercury, Three thousand seven hundred and five times.

The Moon, Ten thousand times.

The Earth, One hundred ninety six times.

Jupiter, The one half.

Mars, Two times.

Venus, Two hundred eighty six times

Mercury, Four hundred and eighteen times.

The Moon, One thousand one hundred twenty two times

The Earth, Twelve times.

Mars, One hundred eighty two times

Venus, Eighty four times.

Mercury, Two hundred sixty six times

The Moon, Seven hundred and fourteen times

The Earth, Fourteen times.

Venus

The Sun is greater then

Saturn is greater then

Jupiter is greater then

Venus is twice as big as *Mars*, and Three times as big as *Mercury*.

Mars contains *Mercury* once and a half.

The *Moon* is greater then *Mars* Thirteen times.
Venus, Six times.
Mercury, Nineteen times.

The <i>Earth</i>	} is distant from the Firmament	49:5672
<i>Saturn</i>		1278644
<i>Jupiter</i>		3542512
<i>Mars</i>		474904
The <i>Sun</i>		4472000
The <i>Moon</i>		489:808

Saturn is distant from *Jupiter* --- 23138640 Miles.
Mars --- 29361440 Miles.
The *Sun* --- 3193352 Miles.
The *Moon* 36171600 Miles.

Jupiter is distant from *Mars* --- 7722800 Miles.
The *Sun* 9294880 Miles.
The *Moon* 13532960 Miles.

Mars is distant from The *Sun* --- 1572080 Miles.
The *Moon* 6310160 Miles.

The *Sun* is distant from the *Moon* 4238080 that is, Four Millions, Two hundred thirty eight thousand, and eighty Miles.

Hæc incredibilia videntur tantum iis, qui Mathematicis demonstrationibus non assueverunt &c.
